**An investment
for the future.**

TopSpot
ECOplus

TopSpot ECOplus – Self-service refrigerated units set new standards.

Self-service counters have become an indispensable part of the fresh produce sector in food retailing and are decisive for turnover and profit. At the same time, refrigeration technology in the fresh produce area generates immense electricity costs. With the TopSpot ECOplus from our new ECOplus product line, you are choosing a product which sets new standards in the area of self-service refrigeration units.

ENERGY-EFFICIENT

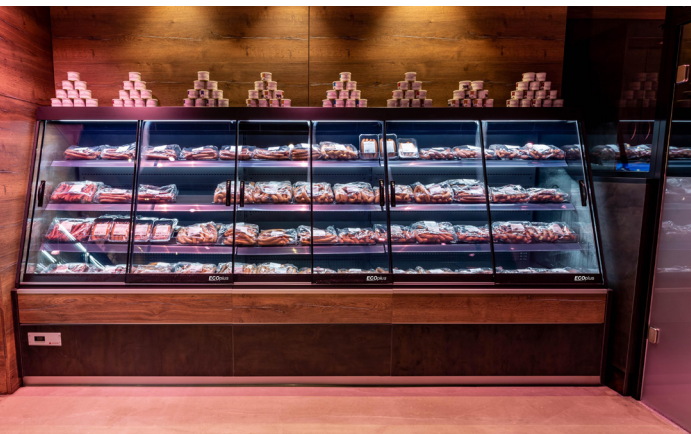

TopSpot ECOplus requires up to up to 70 % less cooling energy compared to conventional open refrigeration units and is therefore highly energy-efficient. The TopSpot ECOplus modules are thus classified in energy efficiency classes B and C.

CONVERTIBILITY

You do not necessarily have to invest in a new refrigeration unit. Our tried and tested TopSpot MIO+ can be easily converted to ECOplus. This ensures maximum investment security.

FLEXIBLE

TopSpot ECOplus reaches temperature classes of up to M0+: even temperatures below 2 °C are possible. This provides a range of different combinations of food presentations.

YOU BENEFIT FROM

Functionality

Easy conversion from TopSpot MIO+ to TopSpot ECOplus possible

Efficiency

Up to 70 % less cooling energy required

Presentation

Ideal for high-yield convenience concepts

Flexibility

Extensive presentation possibilities

Experience product features interactively.
